

Material Safety Data Sheet

Date of printing

: 8/31/2009.

Date of issue

: 8/31/2009

1. Product and company identification

Prepared by

Akzo Nobel Coatings Inc.

Casco Adhesives

1431 Progress Ave.

High Point, NC 27261 US

(336)841-5111

IN CASE OF EMERGENCY (HEALTH OR SPILLS): CHEMTREC (US and Canada) (800) 424-9300

.....

HIGH POINT, NC 27261 US

1431 PROGRESS AVENUE

CASCO ADHESIVES

Prepared For

ATTN:

Product no.: C9563

Product - Class : Hardener 9563

Customer Part Number:

Customer ShipTo ID: 0000108209

2. Hazards identification

Physical state

: Liquid.

OSHA/HCS status

: This material is considered hazardous by the OSHA Hazard Communication Standard

(29 CFR 1910.1200).

Emergency overview

: DANGER!

CAUSES RESPIRATORY TRACT, EYE AND SKIN BURNS. HARMFUL IF SWALLOWED. CONTAINS MATERIAL THAT MAY CAUSE TARGET ORGAN

DAMAGE, BASED ON ANIMAL DATA.

Do not breathe vapor or mist. Do not ingest. Do not get in eyes or on skin or clothing. Use only with adequate ventilation. Keep container tightly closed and sealed until ready

for use. Wash thoroughly after handling.

Routes of entry

: Dermal contact. Eye contact. Inhalation. Ingestion.

Potential acute health effects

Inhalation

: Corrosive to the respiratory system.

Ingestion

: Toxic if swallowed. May cause burns to mouth, throat and stomach.

Other effects of ingestion may include: burns,

Skin

: Corrosive to the skin. Causes burns.

Eyes

Corrosive to eyes. Causes burns.

Other effects of any sentent and

Other effects of eye contact may include: eye damage,

Potential chronic health effects

Carcinogenicity

: No known significant effects or critical hazards.

Mutagenicity

: No known significant effects or critical hazards.

Teratogenicity

: No known significant effects or critical hazards.

Target organs

: Contains material which may cause damage to the following organs: skin.

Medical conditions

aggravated by over-

: pulmonary conditions, skin disorders, eye disorders,

exposure

8/31/2009. 2/6 C9563 0000108209

Hazards identification

See toxicological information (section 11)

3. Composition/information on ingredients

Name formic acid CAS number % by weight Vapor pressure 64-18-6

4.5 kPa (34 mm

Exposure limits OSHA PEL (United States).

TWA: 5 ppm 8 hour(s). ACGIH TLV (United States).

TWA: 5 ppm 8 hour(s). STEL: 10 ppm 15 minute(s).

proprietary

1,3-benzenediol

108-46-3

Not available. Not available.

ACGIH TLV (United States).

TWA: 10 ppm 8 hour(s). STEL: 20 ppm 15 minute(s).

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

First aid measures

Protection of first-aiders

: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

Eye contact

Get medical attention immediately if symptoms occur. Check for and remove any contact lenses. Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Chemical burns must be treated promptly by a physician.

Skin contact

: Get medical attention immediately if symptoms occur. In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Chemical burns must be treated promptly by a physician.

Inhalation

Get medical attention immediately if symptoms occur. Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Loosen tight clothing such as a collar, tie, belt or waistband.

Ingestion

Get medical attention immediately. Wash out mouth with water. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person.

Fire-fighting measures 5.

Flammability of the product

; In a fire or if heated, a pressure increase will occur and the container may burst.

Flash point

: Closed cup: >93.3℃ (>200.0℉)

Flammable limits

: Not available.

Extinguishing media Suitable

: Use an extinguishing agent suitable for the surrounding fire.

Not suitable

None known.

Special exposure hazards

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable

Hazardous thermal decomposition products Decomposition products may include the following materials: carbon dioxide

carbon monoxide

Special protective equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

UNUSUAL FIRE HAZARDS: During emergency conditions, overexposure to products of combustion may cause a health hazard; symptoms may not be immediately apparent. Obtain medical attention.

3/6 8/31/2009. C9563 0000108209

Fire-fighting measures 5.

Special remarks on fire hazards

: Not available.

: Not available.

Special remarks on explosion hazards

6. Accidental release measures

Personal precautions

: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment (see section 8).

Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods for cleaning up

Small spill

: Stop leak if without risk. Move containers from spill area. Dispose of via a licensed waste disposal contractor.

Large spill

Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product.

Handling and storage

Handling

: Put on appropriate personal protective equipment (see section 8). Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

Storage

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

8. Exposure controls/personal protection

Engineering measures

: Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

Hygiene measures

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Personal protection

Selection of personal protective equipment (PPE) is to be established by the employer performing a PPE hazard assessment. In the U.S.A, OSHA requires completion of a documented PPE hazard assessment as described in 29 CFR 1910.132.

Respiratory

: Use properly fitted respiratory protection complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

Dry sanding, flame cutting and/or welding of the dry paint film will give rise to dust and/or hazardous fumes. Wet sanding/flatting should be used wherever possible. If exposure cannot be avoided by the provision of local exhaust ventilation, suitable respiratory protective equipment should be used.

8/31/2009. 4/6 C9563 0000108209

Exposure controls/personal protection 8.

: Chemical-resistant, impervious gloves complying with an approved standard should be Hands

worn at all times when handling chemical products if a risk assessment indicates this is

necessary.

Safety eyewear complying with an approved standard should be used when a risk Eyes

assessment indicates this is necessary to avoid exposure to liquid splashes, mists or

dusts.

Personal protective equipment for the body should be selected based on the task being Skin

performed and the risks involved and should be approved by a specialist before handling

this product.

9. Physical and chemical properties

Physical state

: Liquid.

Burning time

Not applicable.

Burning rate

: Not applicable. Not available.

Color Odor

Not available.

Taste

Not available.

Molecular weight

Not applicable.

Molecular formula

Not applicable.

pН

Not available.

Boiling/condensation point

: Not available.

Melting/freezing point

: Not available.

Critical temperature

: Not available.

Relative density

Vapor density

: Lighter than air

Volatility

62.5% (w/w)

Odor threshold

: Not available.

Evaporation rate

Less than 1. (water) compared with butyl acetate

Viscosity

Not available.

Ionicity (in water)

Not available.

Dispersibility properties

Not available.

Solubility

Not available.

10. Stability and reactivity

Chemical stability

: The product is stable, under normal conditions of storage and use.

Hazardous polymerization

: Will not undergo hazardous polymerization.

Conditions to avoid

No specific data.

Other Conditions to avoid:freezing, light, moisture,

Materials to avoid

: Reactive or incompatible with the following materials: oxidizing materials, metals and

alkalis.

Hazardous decomposition

products

: Not available.

Possibility of hazardous

reactions

: Under normal conditions of storage and use, hazardous reactions will not occur.

Disposal considerations 13.

Waste disposal

: The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any byproducts should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Transport information

Information contained in this section may vary from the actual shipping description depending on quantity in Note: containers, mode of shipment and use of exemptions.

HMIS III ® Hazardous Material Information System (U.S.A.)

Caution: HMIS III ® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risk, and 4 representing severe hazards or risk. Although HMIS III ® ratings are not required on MSDSs under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS III ® ratings are to be used with a fully implemented HMIS III ® program. HMIS III ® is a registered mark of the National Paint & Coatings Association (NPCA).

The customer is responsible for determining the PPE code for this material.

Other special considerations: Not available.

Notice to reader

IMPORTANT NOTE The information in this data sheet is not intended to be exhaustive and is based on the present state of our knowledge and on current laws: any person using the product for any purpose other than that specifically recommended in the technical data sheet without first obtaining written confirmation from us as to the suitability of the product for the intended purpose does so at his own risk. It is always the responsibility of the user to take all necessary steps to fulfill the demands set out in the local rules and legislation. Always read the Material Data Sheet and the Technical Data Sheet for this product if available. All advice we give or any statement made about the product by us (whether in this data sheet or otherwise) is correct to the best of our knowledge but we have no control over the quality or the condition of the substrate or the many factors affecting the use and application of the product. Therefore, unless we specifically agree in writing otherwise, we do not accept any liability whatsoever for the performance of the product or for any loss or damage arising out of the use of the product. All products supplied and technical advice given are subject to our standard terms and conditions of sale. You should request a copy of this document and review it carefully. The information contained in this data sheet is subject to modification from time to time in the light of experience and our policy of continuous development. It is the user's responsibility to verify that this data sheet is current prior to using the product.
